

Bellwork for Week 3: Jan. 20-23, 2004

Bell #11: Answer this question in a thoughtful way:

Do you think you paid enough attention to your Science Classes in Middle School? _____

What did you learn that has helped you this last two weeks?

What do you **wish** you'd learned there?

Bell #12: Cut out the scrambled letters and begin to put together a definition of MINERAL! Paste onto What is a Mineral Puzzle #1.

HINT: Check your textbook for a good mineral definition.

Bell #13: (1) What is the difference between an atom and a molecule?

(2) What can an element's atomic number and mass number tell you about that element?

Bell #14: Is the ice in a glacier a mineral? _____

Why or why not?
