Solar Eclipse Presentation

Diamond Ring

6. As the last bit of photosphere disappears, you see the Diamond Ring, the beautiful ________ forming a ring around the moon with a white jewel of the night.

Crimson Chromosphere

7. After the diamond ring disappears, you only have a ________ seconds to notice the crimson-colored chromosphere before it too is eclipsed.

Solar Corona

8. Once the sun is completely ________, you can see the full glory of the solar corona.

Prominences

9. During totality, you can also see beautiful prominences jetting out from the sun’s “surface.”

Ending Contacts

10. Too quickly, the moon moves away from its alignment with the ________ and ________, and the Eclipse is over.

Eclipse Animation

11. The next Solar Eclipse is in:
