

Bellwork for Week 20: May 24-26, 2004

Bell #87: Put these objects in the correct order of **size** from smallest to biggest:

Moon, Solar System, Virgo Cluster, Milky Way Galaxy, Universe, Earth.

Bell #88: (1) What is the Milky Way? (2) Sketch the Milky Way. (3) Insert our sun in its correct position. (4) How long does it take to rotate once on its axis? (5) How far across is it?

Bell #89: (1) Sketch the life cycle of our sun. (2) Look through your notebook, especially the lab section. What was your favorite topic in this class? Why?
